About Event

Oman NSDI Symposium 2019 is the first Symposium being organized by National Centre for Statistics & Information under patronage of His Excellency Saif bin Mohammed Al Shabibi, Minister of Housing. The Symposium will present a unique opportunity for Oman NSDI stakeholders (Government, Semi Government entities, Private Businesses, and academia) to learn about the latest technology trends and how GIS can support them in their businesses.

The Symposium will focus on *"Role of GeoSpatial Information for Smart Governance"* and *"Oman NSDI' readiness to Geo-Enable the Digital Transformation of Sultanate of Oman"*. The event will witness the launch of Government Licensing Agreement made between Government of Oman and Esri Global Inc.

Second day of event will be dedicated to GeoSpatial Technology advancements wherein the Global experts of GeoSpatial technology from Esri will share the latest GeoSpatial Technology updates and how it can help various Government sectors especially Land Administration, Development of Smart Cities with Artificial Intelligence, Smart Transportation Planning, and Smart Utilities etc. The Symposium will also host a special session for academia sector "GIS for Education" focusing on GIS education.
